MARCH 1965

SUPPORT PRICES ANNOUNCED BY USDA

On March 18, 1965 the U.S. Department of Agriculture announced support prices of \$3.24 per hundredweight for manufacturing milk at the national average butterfat test of 3.73%, and 59.4¢ per pound butterfat for the 1965-66 marketing year. Comparable prices for 1964-65, also at 75% of parity, were \$3.15 for 3.75% average test milk and 58¢ for butterfat.

The milk prices adjusted to 3.5% values are \$3.04 for the new 1965-66 year and were \$2.94 for the marketing year ending March 31, 1965.

The buying price for butter will be up 1 cent at Chicago to 58.966 cents per pound, cheese up 1/2 cent to 36.10 cents and spray nonfat dry milk will remain at the same price, 14.40 cents per pound.

MILWAUKEE RECEIPTS BY COUNTIES

Most of the milk supplied to handlers under the Milwaukee Milk Order comes from producer's farms located in Washington, Waukesha and Dodge Counties, and in that order. These first three counties represent no change in order from 1963 or 1962. The table on page 8 gives December deliveries of producer milk in thousand pounds, the number of farms, and average pounds of daily delivery per farm, for each county. Adams, Columbia, Dane, Marquette and Rock Counties supply much less milk for the market and are combined on the table.

Generally, each county supplied more milk from fewer farms than during the previous year. There were more farms in Dodge and Racine Counties but about the same number or less elsewhere. All counties end up the (to page 8)

PRODUCER NUMBERS

The total number of producers supplying pool plants in the Milwaukee marketing area was about the same for 1964 as in 1963. An analysis of Farm Additions and Farm Withdrawals indicates that there are quite a few more farms that cease to produce, than farms which start to produce milk, in each year. There is also shifting of farms between markets.
